

HIGH PERFORMING MASONRY ENCLOSURES

Presented By:
Brian Trimble, PE*, LEED AP

Director of Industry Development &
Technical Services
International Masonry Institute

WHAT YOU WILL LEARN:

- Understand how masonry contributes to a perfect wall assembly
- How to properly locate building enclosure control layers to achieve a perfect wall concept
- Discover how masonry contributes to energy efficiency
- Comprehend the value of masonry building enclosures. Learn critical details of a masonry cavity wall system

PROGRAM SUMMARY:

A Closer Look Into Masonry Structures!

Contemporary brick, block and stone wall assemblies last for many decades while providing air, vapor and thermal attributes. This seminar will show you how to properly locate these control layers to create sustainable exterior building enclosures contributing to future energy performance benchmarks. Details from the foundation to the top of the wall will be discussed with an emphasis on moisture and thermal control.

PROGRAM DETAILS:

DATE: October 31, 2018

TIME:

7:30 AM - Registration

8:00 AM - 10:00 AM - Program

LOCATION: Building Industry Center

6 Airline Drive

Albany, NY 12205

COST: (Includes Light Breakfast)

\$30.00 Per Person

CREDITS EARNED: 2PDH/ AIA- HSW
